WORK & LEADERSHIP EXPERIENCE

Bank of Montreal   **Toronto, Canada**
Full Stack Software Developer   March 2022 – July 2024

- Developed and maintained web applications using React.js and Node.js/Express.js, delivering secure and responsive digital banking solutions to millions of users.
- Reduced production issues by 12% through proactive debugging and documentation.
- Built responsive components and modules as per design guidelines.
- Collaborated with QA, designers, content strategists, digital managers and product owners to identify technical solutions and deliver high-quality software products.

Caseware International   **Toronto, Canada**
Front End Software Developer   Jan 2019 – Aug 2019

- Developed auditing web applications using Angular framework and managed unexpected behavior of implemented functionality by writing tests.
- Architected and developed table filters, a functionality that allows auditors and accountants to quickly apply filters to menus and tables by showing/hiding different columns/rows.
- Communicated directly with squad members and product owners to accurately determine requirements.

PERSONAL PROJECTS

MindMap - Full Stack Notes Application
Technologies: MongoDB, Express, React, Node.js (MERN)

- Developed a full-stack note-taking application with CRUD capabilities, allowing users to create, edit, delete, and pin notes.
- Implemented secure user authentication, enabling clients to create personal accounts with unique usernames and passwords.
- Designed an intuitive UI for seamless user experience with features like note pinning for easy organization.

React Personal Portfolio Website
Technologies: React, CSS

- Designed, architected, and developed a portfolio website using ReactJS and Bootstrap. Armandev.io
